7+

Years building software that performs in production.

01 PROFILE

Software engineer with 7+ years of experience building full-stack applications, cloud-native systems, and distributed services. Strong background in AWS serverless architecture, backend engineering, frontend delivery, and technical leadership.

02 CAREER

Professional Experience

Jun 2024 – Dec 2025

Software Engineer / Cloud Engineer

Nextstep Engineering Software Solutions

- **Maintained** and **enhanced** an existing AWS-based Flight Profile Optimizer using .NET/C#, Lambda, API Gateway, Step Functions, DynamoDB, and S3.
- **Maintained React Native** and **Xamarin** iPad applications used by **pilots** with the Flight Profile Optimizer Cloud platform.
- **Implemented** complex **aerospace requirements** while collaborating with a **multinational team** across Germany, Italy, Thailand, and Ukraine.
- **Built event-driven workflows** using **S3 Event Notifications** for object creation, **DynamoDB Streams** for item inserts and updates, plus SQS, SNS, and EventBridge. **Deployed** infrastructure using TypeScript CDK.
- **Resolved CloudFormation's 500-resource limit** using nested stacks to simplify maintenance.
- **Monitored** Flight Profile Optimizer **production** environments for multiple customers using Amazon **CloudWatch Logs** and **Datadog**, verified service health, and **escalated critical** errors and warnings.

Nov 2020 – May 2024

Software Developer / Team Lead

Myanmar Information Technology

- **Led development** of a mobile banking platform with a Java backend on Azure Functions and Azure SQL Database, and a Flutter mobile frontend.
- **Delivered iBanking** using the same backend services with an Angular frontend.
- **Led development** of a mobile wallet using Node.js, AWS Lambda, Amazon Cognito, PostgreSQL, and Flutter.
- **Built** an **exchange counter** application using Node.js, AWS Lambda, Amazon Cognito, PostgreSQL, and Angular.

Oct 2018 – Oct 2020

Frontend Developer

Thetys

- **Built single-page applications** with Vue.js, Vuetify, and Vuex from detailed interface designs.
- **Improved usability** and **performance** across browsers, screen sizes, and device types.

TECHNICAL CORE

Languages
TypeScript, JavaScript, C#, Rust, Java, Python, Go

AWS & Cloud
Lambda, API Gateway, Step Functions, SQS, SNS, EventBridge, DynamoDB, S3, CloudWatch Logs, CDK, Azure, Datadog

Backend
Node.js, .NET, Spring Boot, Axum, Express

Frontend & Mobile
React, React Native, Xamarin, Next.js, Astro.js, Vue.js, Flutter

Data
PostgreSQL, MongoDB, MySQL, Redis, DynamoDB

Delivery
Docker, GitLab CI, GitHub Actions, NGINX, Linux, Azure DevOps, Git

EDUCATION

Bachelor of Engineering

Electronics and Communication
West Yangon Technological University
2013 - 2018

Burmese / Native
English / Professional working proficiency

Htet Lin Maung
SOFTWARE ENGINEER

SELECTED WORK / 2026

Systems built to hold up.

Cloud architecture, automation, and performance-focused engineering selected from professional and open-source work.

01

AEROSPACE / AWS

Flight Profile Optimizer

Flight-optimization platform that processes airline operational data and generates trajectory options to reduce fuel burn while meeting flight constraints.

C# / .NET / AWS Lambda / AWS Step Functions / Amazon DynamoDB / Amazon S3

htetlinmaung.github.io/projects/flight-profile-optimizer

02

AZURE / MOBILE / WEB

Mobile Banking

Flutter Mobile Banking and Angular iBanking connected to a shared Java backend running on Azure Functions with Azure SQL Database.

Java / Azure Functions / Azure SQL Database / Flutter / Angular

htetlinmaung.github.io/projects/mobile-banking

03

BACKEND / AWS

Rust Payment Event Pipeline

Serverless payment notification pipeline in Rust using AWS Lambda, SQS, and DynamoDB to handle high-volume events reliably.

Rust / API Gateway v2 / AWS Lambda / Amazon SQS / Amazon DynamoDB / AWS CDK (TypeScript)

htetlinmaung.github.io/projects/rust-ingest

04

ONGOING / RUST / AWS

Exchange Counter

Ongoing foreign-exchange counter platform for rates, physical cash inventory, teller operations, reconciliation, and traceable financial records.

Rust / Axum / Next.js / AWS Lambda / Amazon Aurora PostgreSQL / AWS CDK

htetlinmaung.github.io/projects/exchange-counter

MORE PROJECTS

htetlinmaung.github.io/projects

WebWand	Node.js / Express / Puppeteer / Docker
LoadFire	Rust / YAML / CLI
Report Forge	Rust / sitetopdf / Docker
InstantIO	Node.js / Socket.IO / Docker

ENGINEERING APPROACH

- **Clean code**
- **Cloud solutions**
- **Quality first**
- **Problem solving**
